SUMMARY

A highly skilled and experienced Front End Engineer with a strong background in developing and implementing user-friendly, engaging, and responsive websites and web applications. Proficient in a range of front end technologies, including HTML, CSS, JavaScript, and React. Strong ability to collaborate with cross-functional teams, including designers, back-end developers, and project managers.

EXPERIENCE

Front End Developer, Freelance & Contract (2020 - present)
- Utilized HTML, CSS, JavaScript, React, and Redux to create responsive and interactive user experiences
- Collaborated with clients to gather requirements and provide recommendations on project direction
- Maintained and updated existing websites and applications, including implementing new features and functionality
- Increased a client's customer acquisition rate by more than 10X

Co-Founder & Developer, Mikowski Markham (2018-2020)
- Developed and maintained multiple e-commerce websites
- Implemented custom design, graphic, and theme development
- Created integrations to sync data between Shopify and third-party tools

PROJECTS

GoTo Users - 2022 - https://mikofrosty.github.io/goto-users-documentation/
- Rest API for retrieving fictional user data of any desired size using MongoDB
- Actively used in industry for testing and mock data
- Beautiful & concise front-end documentation

When is Elon Pooping - 2021 - https://mikofrosty.github.io/When-Is-Elon-Pooping/
- Took a deep dive into the Twitter API to retrieve and sift through thousands of data points to reveal trends with the Chart.js graph library
